

Title: - National Physical Laboratory (NPL) Visit on 30 September, 2015
(Organiser: - Dr. Swati Varshney, Assistant Professor)

National Physical Laboratory (NPL) is one of the famous and world-leading centres of excellence in research & development. Our students have got opportunity to visit NPL on the occasion of CSIR Foundation Day which is celebrated every year as NPL open Day on 30 September. The objective of this visit was to expose B.Tech and M.Tech students the ongoing scientific work being carried out at prestigious CSIR lab. Students have got good exposure related to measurement science, polymeric materials, Nanotechnology, Energy harvesting, Thin film technology, Environmental sciences, Superconductivity, OLED concept, Scanning electron microscope, Transmission electron microscope and various other characterization techniques. There were various scientific models and exhibits on display, as well as an audio-visual show on the scientific activities of NPL. This visit was very interesting and informative for B.Tech and M.Tech students. At last, small refreshment was provided to students from NPL authority.
